DISAUTONOMIA NEI PARKINSONISMI

25.03.2025

Prof.ssa Alessandra Fanciulli
Medical University of Innsbruck

Alessandra Fanciulli holds a Tenure Track Professorship in Autonomic Neuroscience and is the Director of the Dysautonomia Center at the Department of Neurology of the Medical University of Innsbruck.

Her research focuses on autonomic failure and other non-motor symptoms in parkinsonian and other neurodegenerative disorders. She coordinates a consortium on medical decision making in multiple system atrophy, studies on pain in people living with multiple system atrophy and on post-COVID-19 cardiovascular autonomic disorders.

Dr Fanciulli is the secretary and of the European Federation of Autonomic Societies and of the Austrian Autonomic Society. For the EAN, she coordinates the upcoming guidelines on the diagnosis and treatment of neurogenic urogenital dysfunction and on symptomatic treatment of atypical parkinsonian syndromes.

She served in the task force for the 218 ESC Syncope Guidelines.
