

# MARTEDÌ DELLA CLINICA NEUROLOGICA

AULA MAGNA - Palazzina delle  
Neuroscienze

Ore 16:00 – 17:00 Casi Clinici

Ore 17.30 – 18.30 Seminario

## BIOMARKERS INNOVATIVI NELLA SLA

**01.04.2025**

**Prof. Pietro Fratta**

*University College of London (UK)*

**Pietro Fratta** is Professor of Cellular and Molecular Neuroscience and he is leading an independent research team since 2015 in the University College of London and a Satellite lab. at the Francis Crick Institute (UK).

He is Consultant Neurologist at the National Hospital for Neurology and Neurosurgery in London.

His clinical and research interests center on motor neuron diseases and RNA biology. He established a Kennedy's Disease-dedicated clinic and a MND Genetics clinic in the UK.

His laboratory has identified novel mechanisms and consequences of TDP-43 related RNA mis-processing; developed novel therapeutic strategies for ALS/FTD; identified novel disease mechanisms for FUS-ALS and FUS-FTD; and identified novel biomarkers for ALS.
